

No Consideration of Sustainability Adverse Impacts

Article 4 of Regulation (EU) 2019/2088

Kyma SGR S.p.A. (hereinafter “Kyma”) does not currently consider the adverse impacts of its investment decisions on sustainability factors as indicated by article 4 of the EU Regulation on sustainability-related disclosures in the financial services sector (the “SFDR”, Regulation (EU) 2019/2088).

This is due to the present uncertainty as to the scope and extent of the information required since the Final Report on draft Regulatory Technical Standards is still subject to the approval of the European Commission.

Moreover, Kyma’s fund has just been launched and no investments were made in 2020.

This said, Kyma considers the principal adverse impacts of its investment decisions on environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters by means of its Responsible Investment Policy, approved by the Board of Directors on December 18th,2020. For further information, please see [Kyma \(kymapartners.com\)](http://kymapartners.com).

As such, Kyma will consider the principal adverse impacts on sustainability factors of new investments that will occur from 2021 onwards and identify mitigating measures if needed.

Kyma seeks in the near future to publish information on its consideration of the “adverse impacts of investment decisions on sustainability factors” in accordance with the SFDR, as the scope of information required to be disclosed becomes clearer and an assessment of principal adverse impacts on sustainability factors will be performed on new investments.
